The Egyptians discovered papyrus (and the reed pen, so they could actually write on it) in 3000 BC, but it would take until 500 BC for papyrus to catch hold in the Mediterranean and West Asia. Papyrus would become one of Egypt's best exports; it was very expensive, and the secrets on how it was made was heavily guarded.

10 Ways Ancient Egyptians Influenced Modern Life - Listverse

Papyrus began as the world's first type of paper, derived from the *Cyperus papyrus* plant. Even though it was developed in Egypt, it spread across the ancient world and was used throughout West Asia. Before papyrus became common, many cultures wrote on clay tablets. It was eventually replaced by the Chinese method of making paper from rags.
