Anticipating a wide range of rebuttals to his central hypothesis (that the kind of collapse experienced by many cultures and civilisations in the past could easily happen to modern-day societies),...

Man vs nature | Books | The Guardian

While Guns, Germs, and Steel explained the geographic and environmental reasons why some human populations have flourished, Collapse uses the same factors to examine why ancient societies, including the Anasazi of the American Southwest and the Viking colonies of Greenland, as well as modern ones such as Rwanda, have fallen apart. Not every collapse has an environmental origin, but an eco-meltdown is often the main catalyst, he argues, particularly when combined with society's response to ...

Amazon.com: Collapse: How Societies Choose to Fail or...

Jared Diamond's previous book Guns, Germs and Steel argued that some societies became more powerful, wealthy, and dominant because of fortuitous circumstances: geography, natural resources (especially plant and animal species), and the diffusion of technologies. 1 Collapse explores why some societies have failed to achieve sustainable management of their resource base and their social structures.

Collapse: How Societies Choose to Fail Or Succeed—Jared...

So, this is a frequent theme: societies collapse very soon after reaching their peak in power. What it means to put it mathematically is that, if you're concerned about a society today, you should be looking not at the value of the mathematical function — the wealth itself — but you should be looking at the first derivative and the second derivatives of the function.

Jared Diamond: Why do societies collapse? | TED Talk...

Environmental damage, climate change, rapid population growth, and unwise political choices were all factors in the demise of these societies, but other societies found solutions and persisted. Similar problems face us today and have already brought disaster to Rwanda and Haiti, even as China and Australia are trying to cope in innovative ways.
