Troubleshooting Guides

If the 360 falls onto its side, the filter bag may be full. Empty the bag and resume normal operation of the cleaner. If emptying the

Access Free Polaris 360 Troubleshooting Guides

bag does not solve the problem, remove the head float from the back of the machine and shake it. If you hear water inside, the float is damaged and needs to be replaced. Contact Polaris to order a new head float.

Troubleshoot the 360 to fix any errors in operation.

Running with Less Power Than Normal. Since the 360 is basically an automatic vacuum cleaner for your pool, there may be times

Access Free Polaris 360 Troubleshooting Guides

when the machine starts to slow down due to the filters clogging with debris. If you notice the 360 slowing down, clean out all of the filters and baskets. Start with the filter screen in the quick disconnect on the hose.

Troubleshooting: Top 10
Problems Solved*

Shorten the Hose Length. One
of the first steps in
Polaris pool cleaner

Access Free Polaris 360 Troubleshooting Guides

troubleshooting for tangles is to check the hose length. You do need a little play in the hose so the cleaner can move freely, but a too-long hose will have a hard time swiveling along with the cleaner.

Polaris Pool Cleaner

Troubleshooting Made Easy

Place the mechanism in the backup valve case. Screw the case back together by hand, ensuring you do not overtighten. Examine the

Access Free Polaris 360 Troubleshooting Guides

hose the backup valve is attached to. Ensure the backup valve opening points towards the Polaris 360 pool sweep. If a backup valve is facing the wrong direction, it will be unable to move the pool sweep away from the

Access Free Polaris 360 Troubleshooting Guides

corners.

*How to Troubleshoot a
Polaris 360 Backup Valve /
Hunker*

fInstallation The 360 is
packaged with a pressure
tester installed on the
